LONDON:  
JOHN WEALE, 59, HIGH HOLBORN,  
AND ST. MARY'S, CAMBRIDGE.  
1858.

A Work on the construction and build of Ships, by the application of Iron, has become now of the utmost importance, not only to Naval Architects, but to Engineers and Ship-owners. In no country does such a work exist, especially of a thoroughly practical nature.

The present Work, it is anticipated, has been written, and

the subjects drawn, in elevation, plan, and detail, to a scale useful for immediate practice, in a folio size, with figured dimensions, and the text in demy 12mo size. The text is sold separately, for the convenience both of the practical shipwright, as well as the general reader whose avocations and literary taste lead him to discuss this new subject of Iron Ship-building.

All maritime nations are awakened to this new art, and a large sale, it is expected, will result from the faithfully drawn examples now presented.

The price of the Work complete,—the Engravings, 24 in number, in a convenient folio size, and the Text of the size of demy 12mo—25s.

The Text, for general readers, classing with the Rudimentary Series, price, separately, 2s. 6d.

DESCRIPTION OF PLATES.

1. Hollow and bar keels, stem and stern posts.

125. RUDIMENTARY TREATISE ON THE COMBUSTION OF COAL AND THE PREVENTION OF SMOKE, Chemically and Practically Considered, by Chas. Wye Williams, M.I.C.E., with

**125\*. Illustrations to ditto . . . . .** 1s. 6d.  
\* The above Supplementary Volumes are of an important character, and add considerably to the usefulness of an already admitted and most valuable series of technical works. The established reputation of which, and the extensive sale in parts of the works, has given a cheering result of a long and laborious task, and on which a very large capital has been expended.
